**Abstract.** With this publication we provide an updated catalogue of the type material of mantises (Mantodea) deposited in the Zoological Museum Hamburg (ZMH). We report 84 type specimens (51 holotypes, 25 paratypes and 8 syntypes) belonging to 64 species (45 valid names and 19 synonyms). Furthermore, we present high resolution illustrations for these type specimens.

**Keywords.** LIB, Herbert Weidner, nomenclature, taxonomy, type illustrations.

## Introduction

Natural history collections have always been places, where objects of different historical and cultural background are assembled, stored and maintained for generations; these objects represent the basis for scientific research. Recently, it has become possible to make museum material more readily accessible beyond borders due to extensive networking and digitization. Yet, large amounts of material remain undigitized; this remains a problem for the scientific community, especially when it comes to type specimens.

The entomological collections of the Zoological Museum Hamburg (ZMH) contain more than four million specimens of diverse background. It goes back to the collections of captains and salesmen and hence covers a diverse geographic range. The collections were supplemented by larger donated and bought collections, the one from the Museum Godeffroy being one of the most important. Many important scientists have worked on the collection, having led to many species descriptions, especially

before WW2. Much of the collection of the holometabolous insects was destroyed in WW2, while most of the hemimetabolous insects and the alcohol collection could be saved. Hence, the hemimetabolous collection contains many types and historical material. This type material has been documented in the catalogues by the former curator Herbert Weidner. As part of this, the first Mantodea Burmeister, 1838 type catalogue was published in 1964 (Weidner 1964), which was complemented by an addition in 1977 (Weidner 1977). At this time, the type collection included 52 species with a total of 60 specimens. However, these catalogues were in German language and contained many uncertainties and problems. Further, the catalogues have not been updated since then. Therefore, we recently started to update the catalogues of the type material of the entomological collections of the Zoological Museum Hamburg (ZMH), now part of the Leibniz Institute for the Analysis of Biodiversity Change (LIB). The results are provided in detailed catalogues that were published in the last years (Dey & Husemann 2018a, 2018b on Orthoptera; Henningsen *et al.* 2020 on Odonata; Simoes *et al.* 2021 on Cassidae; Zahiri *et al.* 2021a, 2021b on Lepidoptera; Botero *et al.* 2023 on Cerambycidae). Here, we continue this work and provide and updated and annotated catalogue of the Mantodea types housed in the ZMH.

## Material and methods

For this catalogue, all type specimens as well as their labels and existing prepared genitalia were separated from the main collection and photographed. The close up views of the genitalia were taken with a Keyence VHX-7000 (lens VHX-E20; Keyence, Osaka, Japan). All other images were taken with the Passport Portable Digital Imaging System from Visionary Digital (DUN Inc., California, USA). This system included a Canon EOS 6D camera, different macro lenses (Canon MP-E 50 mm, 65 mm and 100 mm) and a Canon Speedlite lighting system.

The taxonomic classification used in this catalogue follows Schwarz & Roy (2019). Double slash (//) separates data from different labels whereas a single slash (/) separates single lines within a label. For unreadable data a question mark (?) was added. The habitus of several specimens is no longer completely preserved. Especially antennae and tarsi are often missing. Nevertheless, we have used the designation “complete” as soon as the main body as well as at least one leg of each pair are still present.

## Results

Class Insecta Linnaeus, 1758  
Order Mantodea Burmeister, 1838  
Family Acanthopidae Burmeister, 1838

*Acontistella violacea* Beier, 1931

Fig. 1

*Acontista fraterna* Saussure & Zehntner, 1894: 136.

*Acontistella violacea* Beier, 1931: 18–19.

*Acontista fraterna* – Rehn 1935: 253–254 (syn.).

### Type material

#### Holotype (1 male)

COSTA RICA • ♂ (Fig. 1); “// Type // genitalia / A. Agudelo / August 2017 // Costa Rica / Farm Hamburg am / Reventazon 30.IX.26 / Eing. Nr. 52.1927 // *Acontistella / violacea* ♂ / det. Beier / Type!?”; ZMH 841121.

**Type locality**

Costa Rica: Farm Hamburg at Reventazón River.

**Current status**

Synonym of *Acontista fraterna* Saussure & Zehntner, 1894.

**Fig. 1.** *Acontistella violacea* Beier, 1931, holotype, ♂ (ZMH 841121). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d.** Lateral view. **e-f.** Genitalia. White scale bars = 10 mm; black scale bar = 0.50 mm.

### **Habitus**

Complete. Genitalia were prepared after the images were taken.

Family Amorphoscelidae Stål, 1877

***Amorphoscelis austrogermanica*** Werner, 1923  
Fig. 2a–e

*Amorphoscelis austrogermanica* Werner, 1923: 108–109.

### **Type material**

#### **Holotype** (1 male)

NAMIBIA • ♂ (Fig. 2a–e); “// Holotype // genitalia / R. Roy / 3175 // Z. M. H. / Hamburg // Farm Neitsas / Bez. Grootfontain / D. S. W. Afrika / Dr. med. G. Fock lg. 07. / ded. 20.11.1908. // *Amorphoscelis / austrogermanica* / Type ♂ Wern. / Fr. Werner det. 1922. // Fr. Werner / publ. 1923.”; ZMH 841075.

### **Type locality**

Farm Neitsas in the area of Grootfontein [Namibia].

### **Current status**

Valid species.

### **Habitus**

Incomplete: last pair of legs is missing. Genitalia preparation is present.

Family Chroicopteridae Giglio-Tos, 1915

***Gonypeta benguelae*** Saussure, 1869  
Fig. 2f–h

*Gonypeta benguelae* Saussure, 1869: 64.

*Ligentella benguelae* – Kaltenbach 1996: 257–259.

### **Type material**

#### **Holotype** (1 female)

ANGOLA • ♀ (Fig. 2f–h); “// Holotype // O 277 ♀ / Benguela // Z. M. H. / Hamburg // Benguelae / Sss. // *Parentella* ♀ / *benguelae* Sauss. / det. Beier”; ZMH 833033.

### **Type locality**

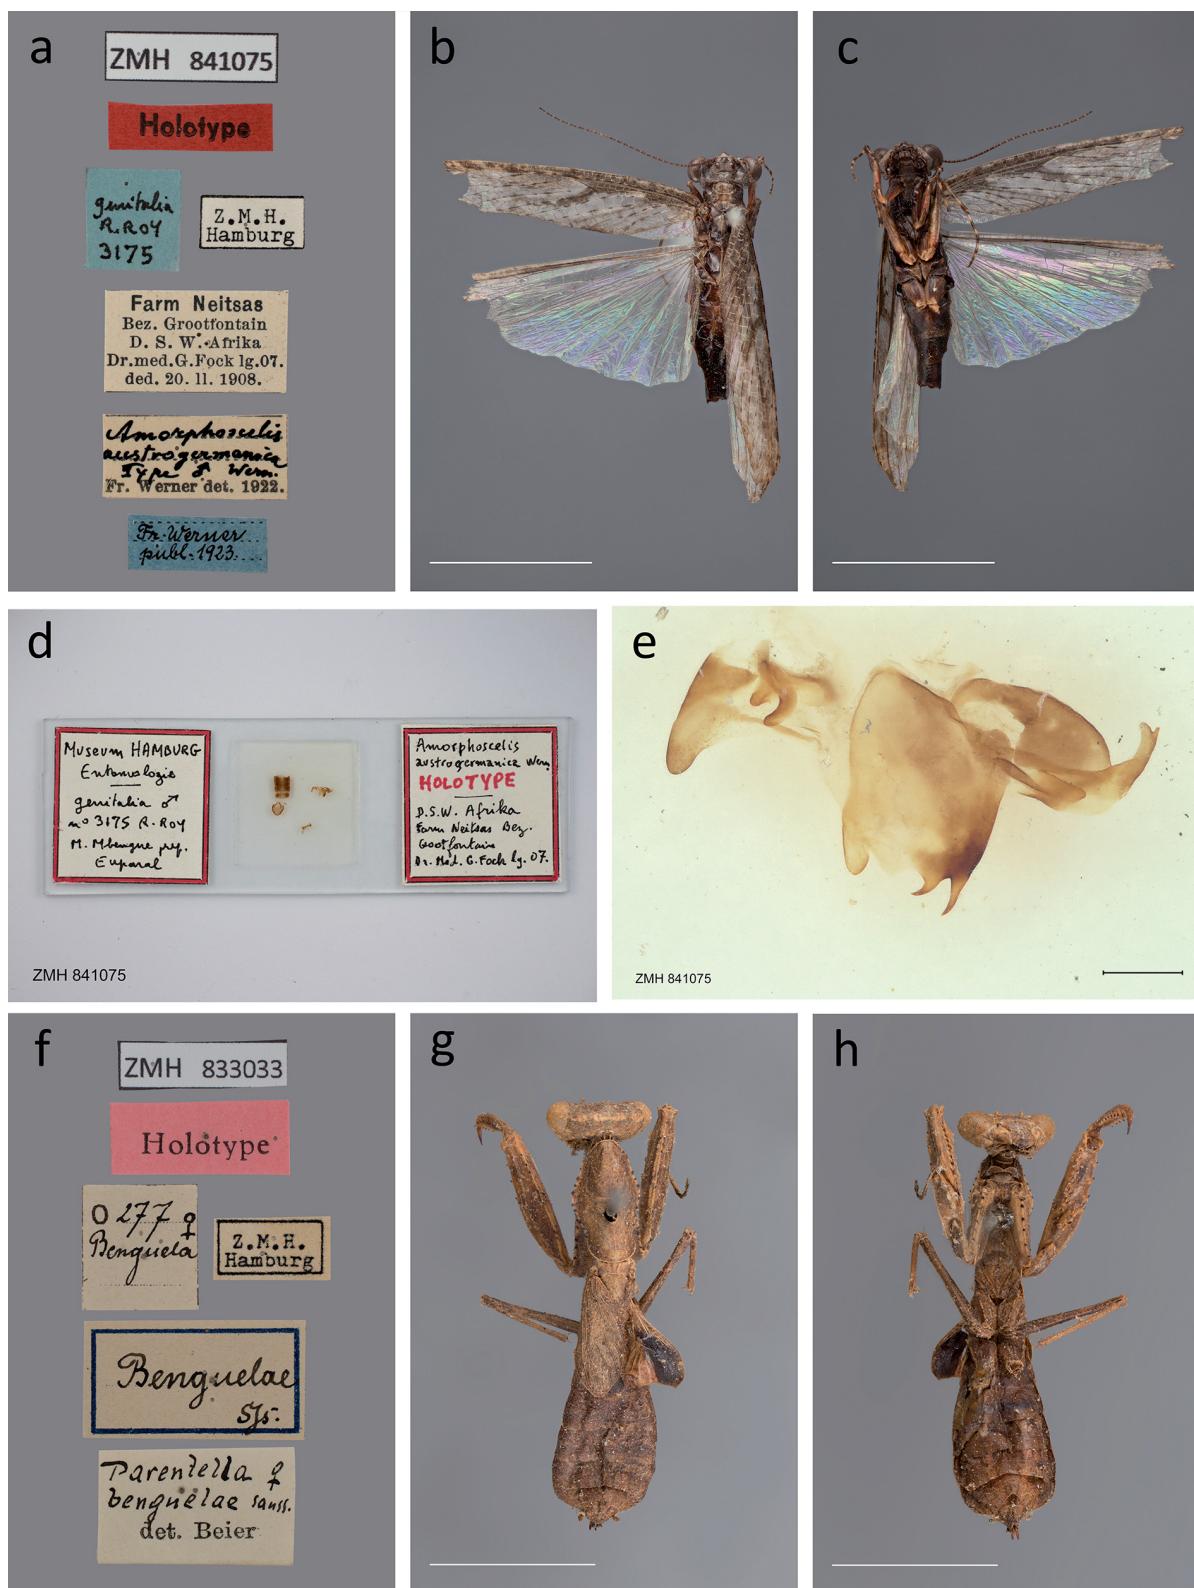

West Africa, Benguela [Angola].

### **Current status**

Valid species.

### **Habitus**

Incomplete: last pair of legs is missing.

**Fig. 2. a–e.** *Amorphoscelis austrogermanica* Werner, 1923, holotype, ♂ (ZMH 841075). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–e.** Genitalia. **f–h.** *Gonypteta benguelae* Saussure, 1869, holotype, ♀ (ZMH 833033). **f.** Labels. **g.** Dorsal view. **h.** Ventral view. White scale bars = 10 mm; black scale bar = 0.50 mm.

## Remarks

In the original publication Saussure quotes “Africa occidentalis” [West Africa] as type locality. However in a later publication (Saussure 1871), he gives a more detailed description of this type specimen and quotes Benguela as more specific type locality.

*Galepsus (Galepsus) thomseni* – Beier 1954: 22.

### Type material

#### Holotype (1 female)

NAMIBIA • ♀ (Fig. 12e–g); “// D.-Sw.-Afrika / Farm Okosongomingo / am kleinen Waterberg // Hans Thomsen / leg. VII – VIII.1912. / ded. 26.IX.1913. // Auf Wunsch v. / Michaelsen / umgetauft. // *Galepsus niger* Wern. / ♀ L. Type / Fr. Werner det. 1922. // *Gal. thomseni* / ♀ L. Wern. / Type // Fr. Werner / publ. 1923. // Infolge ungenüg. Verpackung / zerbrochen etc. 1.III.1923 von / Werner zurück. / cfr. Werner i. litt. 25.III.23.”; ZMH 833040.

### Type locality

Farm Okosongomingo at Klein-Waterberg [Namibia].

### Current status

Valid species.

### Habitus

Incomplete: last pair of legs is missing.

*Galepsus tuberculatus* Beier, 1931

Fig. 13

*Galepsus tuberculatus* Beier, 1931: 4.

*Tuberculepsus tuberculatus* – Roy & Schütte 2010: 402–405.

### Type material

#### Holotype (1 male)

MADAGASCAR • ♂ (Fig. 13); “// Type // genitalia / R. Roy / 3736 // Nossi-Bé / P. Frey leg. / ded. 23.XI.1898 // *Galepsus* ♂ / *tuberculatus* n. sp. / det. Beier / Typus! // *Tuberculepsus* / *tuberculatus* (Beier) / ♂ / R. Roy det. 2005”; ZMH 833049.

### Type locality

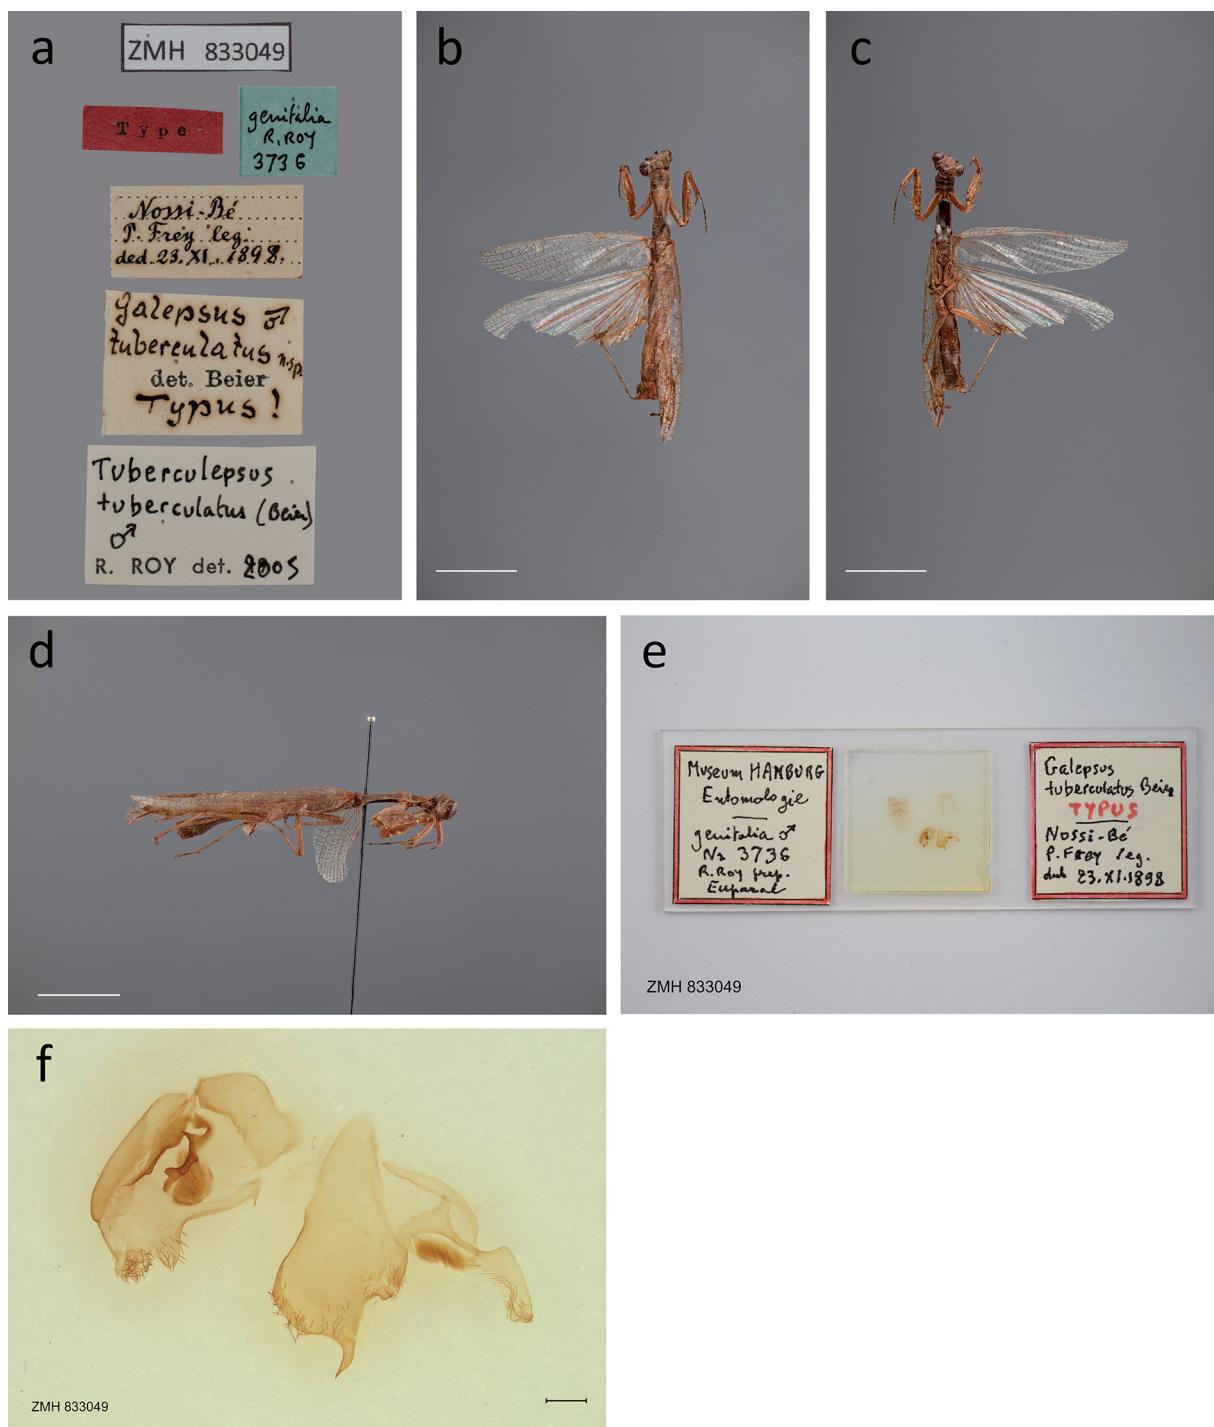

Nosy Be [Madagascar].

### Current status

Valid species.

### Habitus

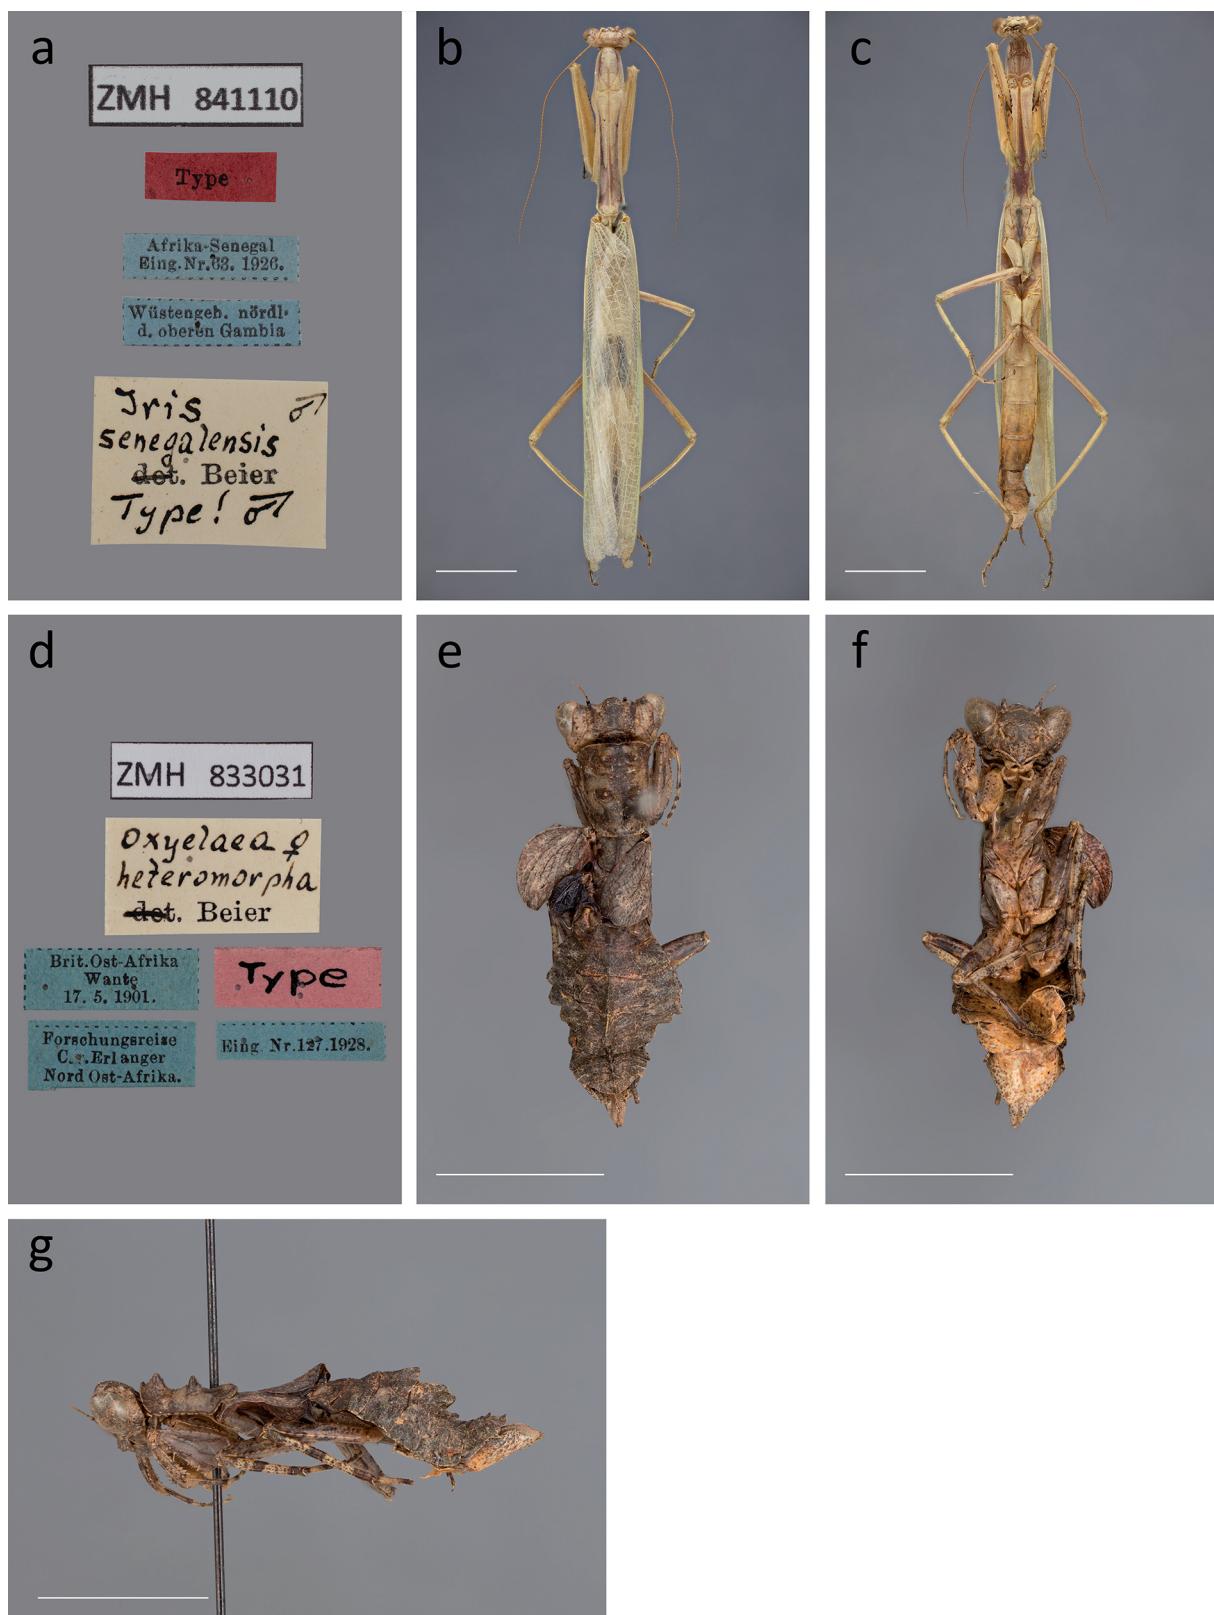

Complete. Genitalia preparation is present.

**Fig. 13.** *Galepsus tuberculatus* Beier, 1931, holotype, ♂ (ZMH 833049). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d.** Lateral view. **e–f.** Genitalia. White scale bars = 10 mm; black scale bar = 0.50 mm.

*Iris senegalensis* Beier, 1931  
Fig. 14a–c

*Iris senegalensis* Beier, 1931: 7–8.

**Fig. 14.** **a–c.** *Iris senegalensis* Beier, 1931, holotype, ♂ (ZMH 841110). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–g.** *Oxyelaea heteromorpha* Beier, 1930, paratype, ♀ (ZMH 833031). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. **g.** Lateral view. Scale bars = 10 mm.

**Type material**

**Holotype** (1 male)

SENEGAL • ♂ (Fig. 14a–c); “// Type // Afrika-Senegal / Eing. Nr. 63.1926. // Wüstengeb. nördl. / d. oberen Gambia // *Iris* ♂ / *senegalensis* / det. [crossed out] Beier / Type! ♂”; ZMH 841110.

**Type locality**

Senegal: desert area north of the upper Gambia River.

**Current status**

Valid species.

**Habitus**

Complete.

*Oxyelaea heteromorpha* Beier, 1930

Fig. 14d–g

*Oxyelaea heteromorpha* Beier, 1930: 433–434.

**Type material**

**Paratype** (1 female)

KENYA • 1 ♀ (Fig. 14d–g); “// *Oxyelaea* ♀ / *heteromorpha* / det. [crossed out] Beier // Brit. Ost-Afrika / Wante / 17.5.1901.// Forschungsreise / C. Erlanger / Nord Ost-Afrika. // Type // Eing. Nr. 127.1928.”; ZMH 833031.

**Type locality**

Kenya: Maziwa Mitatu and Maungu.

**Current status**

Valid species.

**Habitus**

Complete.

*Tarachodes abyssinicus* Beier, 1931

Fig. 15a–c

*Tarachodes abyssinicus* Beier, 1931: 2–3.

*Tarachodes* (*Tarachodes*) *abyssinicus* – Ehrmann 2002: 340.

**Type material**

**Holotype** (1 male)

ETHIOPIA • ♂ (Fig. 15a–c); “// Type // Südl. Abessinien // Hanadscho Neben- / fluss d. Ganale. / 18.–19.4.1901. // Forschungsreise / C. v. Erlanger / Nord-Ost-Afrika. // Eing. Nr. 127.1928. // *Tarachodes* / *abyssinicus* / det. [crossed out] Beier / Type! ♂”; ZMH 833037.

**Type locality**

Southern Abyssinia, Hanadscho, sidearm of the Ganale River [Ethiopia].

### Current status

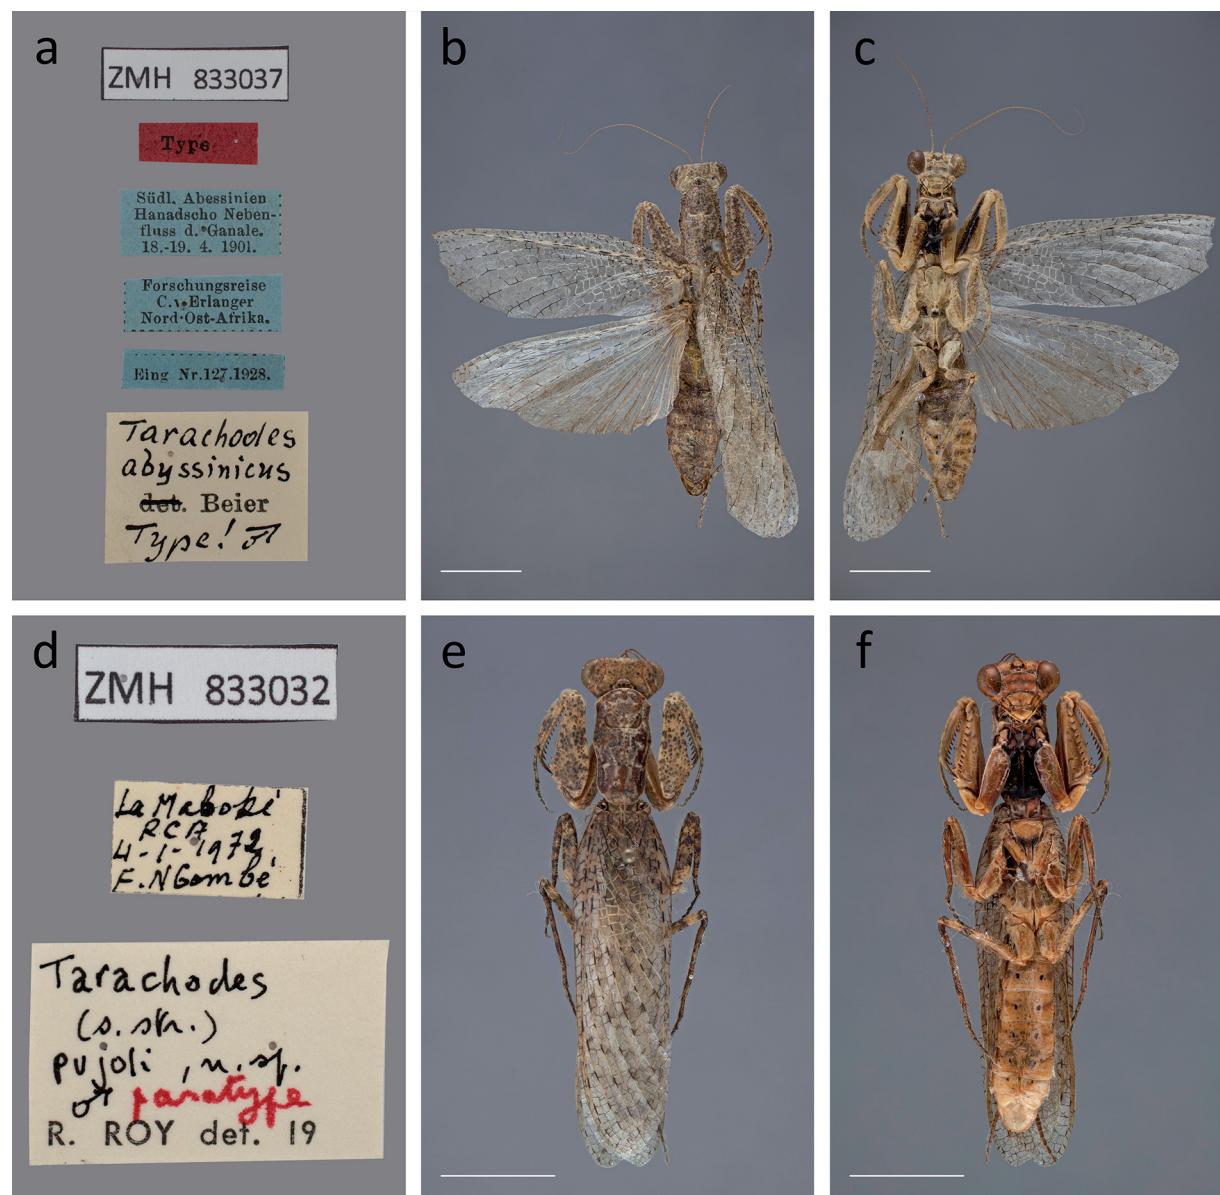

Valid species.

### Habitus

Complete.

*Tarachodes (Tarachodes) pujoli* Roy, 2002  
Fig. 15d–f

*Tarachodes (Tarachodes) pujoli* Roy, 2002: 535–536.

**Fig. 15.** **a–c.** *Tarachodes abyssinicus* Beier, 1931, holotype, ♂ (ZMH 833037). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** *Tarachodes (Tarachodes) pujoli* Roy, 2002, paratype, ♂ (ZMH 833032). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

**Type material**

**Paratype** (1 male)

CENTRAL AFRICAN REPUBLIC • 1 ♂ (Fig. 15d–f); “// La Maboké / RCA / 4-1-1972 / F. NGombé // *Tarachodes* / (s. (?)) / *pujoli*, n. sp. / ♂ paratype / R. Roy det. 19”; ZMH 833032.

**Type locality**

Central African Republic: La Maboké.

**Current status**

Valid species.

**Habitus**

Complete.

Family Gonyptidae Westwood, 1889

***Elaea infumata*** Beier, 1931

Fig. 16a–c

*Elaea infumata* Beier, 1931: 2.

**Type material**

**Holotype** (1 male)

KENYA • ♂ (Fig. 16a–c); “// Type // Forschungsreise / C. v. Erlanger / Nord-Ost-Afrika. // Brit. Ost-Afrika / Wante / 17.5.1901. // Eing. Nr. 127.1928. // *Elaea* ♂ / *infumata* Beier / det. Beier / Type! ♂”; ZMH 841072.

**Type locality**

Wante, British East Africa [Kenya].

**Current status**

Valid species.

**Habitus**

Incomplete: not one leg of the last pair is completely preserved.

**Remarks**

The type locality given by Ehrmann (2002) is not correct. The expedition report from the collector Erlanger (Erlanger 1904) clearly shows that his group was traveling to El-Uak [El-Wak, Kenya] after crossing the rivers Danale and Daua [Dawa] at the end of April 1901. From El-Uak they traveled westwards to Bardera [Bardere, Somalia]. Therefore, we assume that the type locality refers to Wante next to El-Wak in Kenya which is located next to the border with Somalia.

Family Hoplocoryphidae Giglio-Tos, 1916

***Hoplocorypha brevicollis*** Beier, 1931

Fig. 16d–f

*Hoplocorypha brevicollis* Beier, 1931: 6.

### Type material

#### Holotype (1 male)

SOUTH AFRICA • ♂ (Fig. 16d–f); “// Type // Bothaville, / Orange-Freistaat. / 9.98. / Dr. H. Brauns leg. / vend. 9.X.1899. // *Hoplocorypha brevicollis* n. sp. / Type! ♂ / det. Beier”; ZMH 833036.

### Type locality

Bothaville, Orange Free State [South Africa].

### Current status

Valid species.

**Fig. 16.** **a–c.** *Elaea infumata* Beier, 1931, holotype, ♂ (ZMH 841072). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** *Hoplocorypha brevicollis* Beier, 1931, holotype, ♂ (ZMH 833036). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

### Habitus

Complete.

Family Hymenopodidae Giglio-Tos, 1915

*Catasigerpes erlangeri* Beier, 1931  
Fig. 17

*Oxypiloidea (Oxypiloidea) lobata* Schulthess-Schindler, 1898: 179.  
*Catasigerpes erlangeri* Beier, 1931: 9–10.

*Oxypiloidea (Oxypiloidea) lobata* – Roy 2013: 284–287 (syn.).

### Type material

#### Holotype (1 male)

KENYA • ♂ (Fig. 17); “// Type // genitalia / R. Roy / 2073 // Forschungsreise / C. v. Erlanger / Nord-Ost-Afrika. // Brit. Ost-Afrika / Wante / 17.5.1901. // Eing. Nr. 127.1928. // *Catasigerpes / erlangeri* / det. [crossed out] Beier / Type! ♂ // *Oxypiloidea / brunneriana* (Sauss.) / ♂ / R. Roy det. 1975”; ZMH 841097.

### Type locality

Wante, British East Africa [Kenya].

### Current status

Synonym of *Oxypiloidea (Oxypiloidea) lobata* Schulthess-Schindler, 1898.

### Habitus

Complete. Genitalia preparation is present.

### Remarks

The type locality given by Ehrmann (2002) is not correct. The expedition report from the collector Erlanger (Erlanger 1904) clearly shows that his group was traveling to El-Uak [El-Wak, Kenya] after crossing the rivers Danale and Daua [Dawa] at the end of April 1901. From El-Uak they traveled westwards to Bardera [Bardere, Somalia]. Therefore, we assume that the type locality refers to Wante next to El-Wak in Kenya which is located next to the border with Somalia.

*Presibylla speciosa* Roy, 1996  
Fig. 18a–d

*Presibylla speciosa* Roy, 1996: 84–86.

### Type material

#### Paratype (1 male)

CAMEROON • 1 ♂ (Fig. 18a–d); “// *Sibylla* ♂ / griffini G. Tos / det. Beier // *Presibylla / speciosa* Roy / ♂ paratype / R. Roy det. 1992 // Kamerun / Edea / M. Jensen / ded. 13.X.1911”; ZMH 841095.

### Type locality

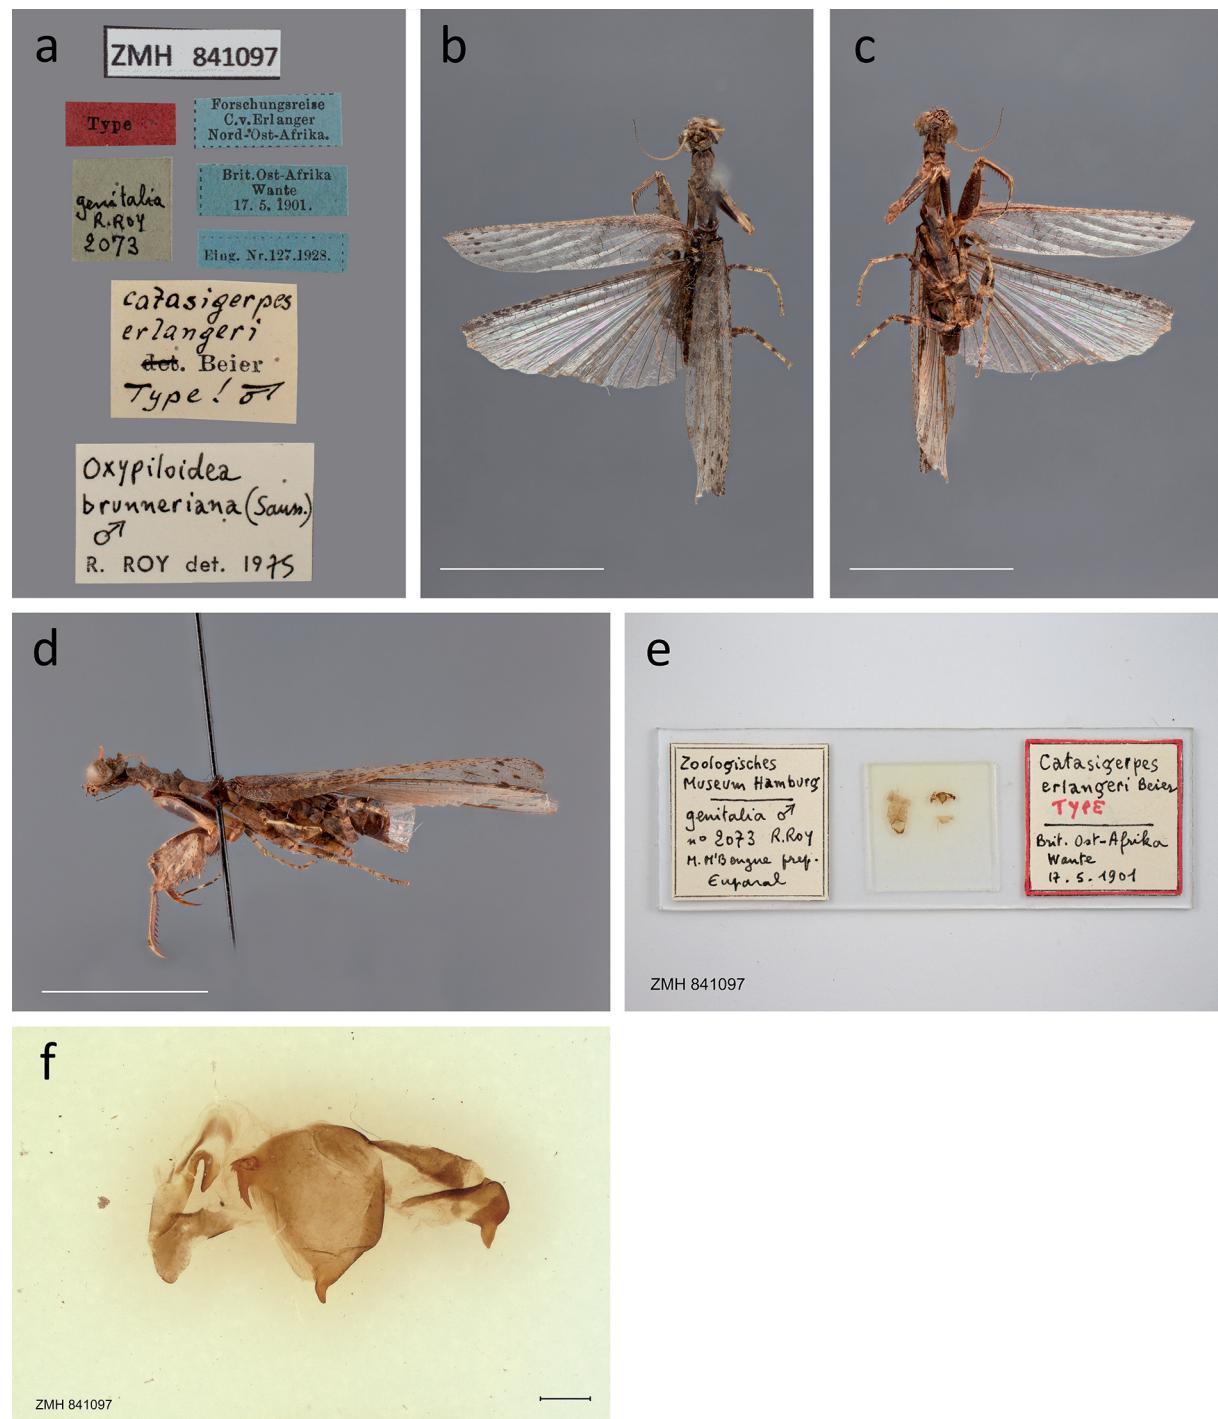

Cameroon.

## Current status

Valid species.

## Habitus

Incomplete: most legs are not completely preserved or even missing.

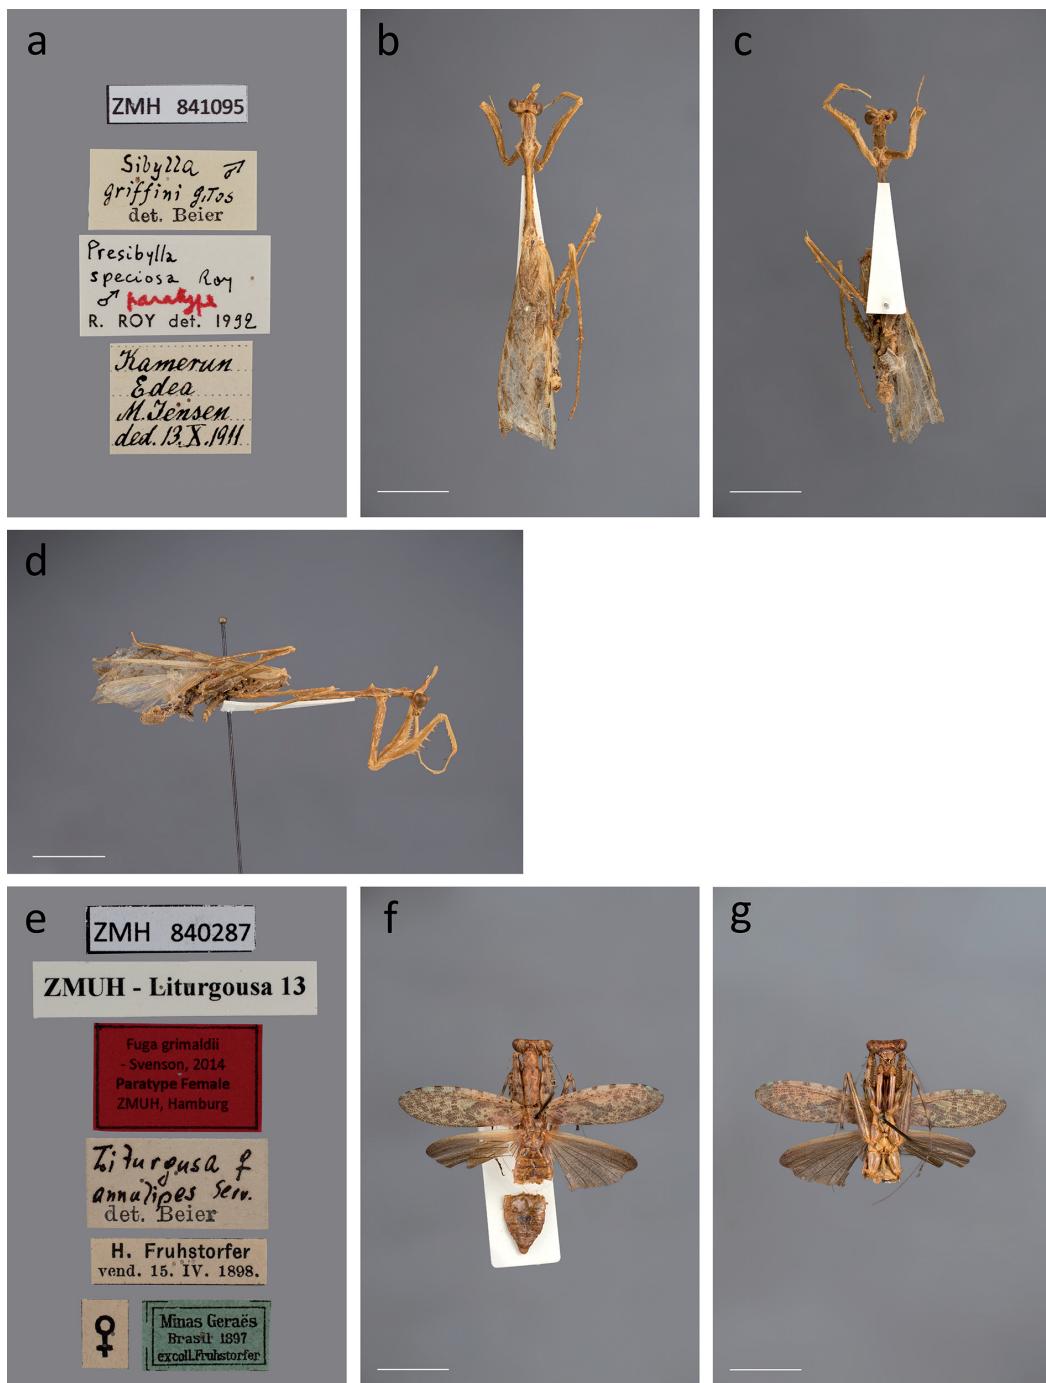

**Fig. 17.** *Catasigerpes erlangeri* Beier, 1931, holotype, ♂ (ZMH 841097). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d.** Lateral view. **e–f.** Genitalia. White scale bars = 10 mm; black scale bar = 0.50 mm.

SENEGAL • ♂ (Fig. 23a–c); “// Type // Afrika-Senegal / Eing. Nr. 63.1926. // Wüstengeb. nördl. / d. oberen Gambia // *Epitenodera gambiensis* / det. [crossed out] Beier / Type! ♂”; ZMH 841122.

**Paratypes** (2 males)

SENEGAL • 1 ♂ (Fig. 23d–f); “// Paratype // *Epitenodera gambiensis* / det. [crossed out] Beier / Paratype ♂ // Wüstengeb. nördl. / d. oberen Gambia // Afrika-Senegal / Eing. Nr. 63.1926.”; ZMH

**Fig. 22. a–c.** *Archimantis latistyla gigantea* Beier, 1963, paratype, ♂ (ZMH 76961). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–h.** *Choeradodis columbica* Beier, 1931, holotype, ♂ (ZMH 841082). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. **g–h.** Genitalia. White scale bars = 10 mm; black scale bar = 1.00 mm.

841108 • 1 ♂ (Fig. 24a–c); “// Paratypoid // Wüstengeb. nördl. / d. oberen Gambia // Afrika-Senegal / Eing. Nr. 63.1926. // *Epitenodera / gambiensis* / det. [crossed out] Beier / Paratype ♂”; ZMH 841109.

#### Type locality

Senegal: desert area north of the upper Gambia River.

#### Current status

Synonym of *Epitenodera brevipennis* (Saussure, 1871).

**Fig. 23.** *Epitenodera gambiensis* Beier, 1931. **a–c.** Holotype, ♂ (ZMH 841122). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** Paratype, ♂ (ZMH 841108). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

## Habitus

All specimens incomplete: abdomen is missing. The abdomens of all three specimens were already missing in the original description.

***Hierodula (Rhombodera) rollei* Beier, 1935**  
Fig. 24d–f

*Hierodula (Rhombodera) rollei* Beier, 1935c: 85–86.

*Rhombodera rollei* – Ehrmann 2002: 308.

**Fig. 24.** a–c. *Epitenodera gaudiensis* Beier, 1931, paratype, ♂ (ZMH 841109). a. Labels. b. Dorsal view. c. Ventral view. d–f. *Hierodula (Rhombodera) rollei* Beier, 1935, holotype, ♀ (ZMH 841076). d. Labels. e. Dorsal view. f. Ventral view. Scale bars = 10 mm.

**Type material**

**Holotype** (1 female)

INDONESIA • ♀ (Fig. 24d–f); “// 40. ♀ / ZMUH / Typus // ZMUH-MANTODEA / 40. ♀ / Rhombodera // Type // Ins. Obi, / Molukken. / H. Rolle vend. / 15.III.1903. // *Hierodula* (R.) / rollei n. sp. / det. Beier / Type! ♀”; ZMH 841076.

**Type locality**

Obi Islands, Maluku Islands [Indonesia].

**Current status**

Valid species.

**Habitus**

Complete.

***Hierodula (Parhierodula) salomonis* Werner, 1930**

Fig. 25a–c

*Hierodula (Parhierodula) salomonis* Werner, 1930a: 38.

*Hierodula salomonis* – Ehrmann 2002: 182.

**Type material**

**Paratype** (1 male)

SOLOMON ISLANDS • ♂ (Fig. 25a–c); “// *Hierodula* (Parh.) / salomonis Werner / Paratype ♂ // RUAVATU X. 28 / GUADALCANAR / SALOMONEN // e // NMB- / MANTO0000741 // Paratype ♂”; ZMH 841103.

**Type locality**

Guadalcanal (Aola, Domma, Ruavatu), New Georgia (Batuna), Malaita (Buma), Central (Savo) [Solomon Islands].

**Current status**

Valid species.

**Habitus**

Complete.

**Remarks**

In the original publication no precise type location was defined. This type specimen came to the ZMH through a type exchange between the ZMH and the Museum Basel (NMB). The NMB received one specimen of *Eremiaphila yemenita* (paratype 1 female, ZMH 844036) in exchange for *Hierodula (Parhierodula) salomonis* (paratype 1 male, NMB-MANTO0000741).

***Hierodula (Hierodula) tonkinensis* Beier, 1935**

Fig. 25d–f

*Hierodula (Hierodula) tonkinensis* Beier, 1935c: 81.

*Hierodula tonkinensis* – Ehrmann 2002: 183.

### Type material

#### Holotype (1 male)

VIETNAM • ♂ (Fig. 25d–f); “// Type // Tonkin / Fruhstorfer. // *Hierodula / tonkinensis* / n. sp. / det. Beier / Type! ♂ // „*Hierodula / notata*“ / H. Fruhstorfer / vend. 5.VI.1899.”; ZMH 841074.

### Type locality

Tonkin [Vietnam].

### Current status

Valid species.

**Fig. 25. a–c.** *Hierodula (Parhierodula) salomonis* Werner, 1930, paratype, ♂ (ZMH 841103). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** *Hierodula (Hierodula) tonkinensis* Beier, 1935, holotype, ♂ (ZMH 841074). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

### Habitus

Complete.

*Mantis japonica* Saussure, 1869

JAPAN • ♀ (Fig. 26a–c); “// Holotype // O 381 / ♀ / Japan // A. Fritze serips. 1889 – 1914 / Im Genfer Musem / ♂ und ♀ von China / und vom Himalaya. // Nur dieses Stück kann das / von Saussure in *Mélanges / Orthopterol.* T. I. fasc. III. 1870 / p. 238/39 (?) *Mantis ja- / ponica* (n. sp.) ♂ („Habite: / Le Japon (musée de Hambourg) / beschriebene Exemplar sein. / Die Beschreibung stimmt in / allen Punkten (exclus. / „trois branches à la veine / discoidale“), ganz besonders in / den beiden recht dunklen / Punkten „cuisses affrant sur / le deux faces un point brun / situé avant le milieu“, nur / dass dieser point brun von / einer dereinst durch die beiden / Vorderschenkel hindurchge- / stochenen Nadel herröhrt!! / Das Stück ist außerdem / kein *Mantis*-♂, sondern ein / *Tenodera*-♀. M. v. Brunn / 20.VIII.1895. / Diese Art *M. japonica* ist sonst auch (?) / (?) cfr. Westwood *Revisio Insect. Fam. Mantid.* // *Tenodera* ♀ / *sinensis* Sauss. / det. Beier // Ein ganz ebensolches / Exemplar sowie ver- / schiedene völlig über- / einstimmende erhielt / das Museum mitten / unter einer grösseren / Anzahl ♂ u. ♀ *Tenodera* / *aridifolia* Stoll (? var. *si-* / *nensis* Sss.) normaler / Grösse u. Färbung aus / Japan in Alkohol. / 2.I.1898. / T. Lenz vend.”; ZMH 841099.

### Type locality

Japan.

### Current status

Synonym of *Tenodera aridifolia* (Stoll, 1813) or *Tenodera sinensis* Saussure, 1871. Synonymy not clarified without doubt.

### Habitus

Incomplete: two pairs of legs are not completely preserved.

### Remarks

Some sources claim that the first description of *Mantis japonica* was published by Saussure in 1871. In fact, the first description of this species was written in the publication of 1869. In the 1871 published “*Mélanges Orthoptérologiques*” Saussure describes not only the species in general but the individual specimen that can be found in the type collection of the ZMH.

*Mantis religiosa macedonica* Karaman, 1961

Fig. 26d–f

*Mantis religiosa religiosa* Linnaeus, 1758: 426.

*Mantis religiosa macedonica* Karaman, 1961: 61–63.

NORTH MACEDONIA • 1 ♂ (Fig. 26d–f); “// Paratypoid // *Mantis religiosa macedonica* n. ssp. // Vodno / 25.VIII.60. / M. K. // M. Karaman / ded. Eing. 21/60”; ZMH 84118.

## Type locality

## Macedonia.

## Current status

Synonym of *Mantis religiosa religiosa* Linnaeus, 1758.

**Fig. 26.** **a–c.** *Mantis japonica* Saussure, 1869, holotype, ♀ (ZMH 841099). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** *Mantis religiosa macedonica* Karaman, 1961, paratype, ♂ (ZMH 841118). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

### Habitus

Complete.

*Neacromantis costaricensis* Beier, 1931

Fig. 27

*Antemna rapax* Stål, 1877: 88–89.

*Neacromantis costaricensis* Beier, 1931: 19–20.

*Antemna rapax* – Agudelo Rondón et al. 2007: 155 (syn.).

### Type material

#### Holotype (1 male)

COSTA RICA • ♂ (Fig. 27); “// Type // genitalia / A. Agudelo / August 2017 // Costa Rica / Farm Hamburg / am Reventazon / 10.VI.1926 / Nachts a. Gebüschen // Ferd. Nevermann / leg. ded. / Eing. Nr. 99/26 // *Neacromantis* / ♂ / *costaricensis* / det. Beier / Typus!”; ZMH 841094.

### Type locality

Costa Rica: Farm Hamburg at Reventazón River.

### Current status

Synonym of *Antemna rapax* Stål, 1877.

### Habitus

Complete. Genitalia were prepared after the images were taken.

*Parastagmatoptera abnormis* Beier, 1963

Fig. 28

*Mantis flavoguttata* Audinet-Serville, 1838: 183–184.

*Parastagmatoptera abnormis* Beier, 1963: 10.

*Parastagmatoptera flavoguttata* – Lombardo & Umbriaco 2011: 31–34 (syn.).

### Type material

#### Holotype (1 male)

SURINAME • ♂ (Fig. 28); “// Type // Surinam / ex. Coll. Fruhstorfer // *Parastagmat.* / *abnormis* / n. sp. / det. Beier / Type! ♂ // H. Fruhstorfer / vend. 6.III.1898. // *P. flavoguttata* / DET / LOMB.-UMB. 2010 // *Parastagmatoptera* [*Mantis*] *flavoguttata* / (Audinet-Serville, 1838): #10, 183–184 / syn. nov. *Parastagmatoptera abnormis* / Beier, 1963: 10 – Holotypus ♂ / Lombardo & Umbriaco, 2011: 31–34. / Gen.-Präparat, getrocknet, / F. Lombardo, IX.2009–XII.2010”; ZMH 841104.

### Type locality

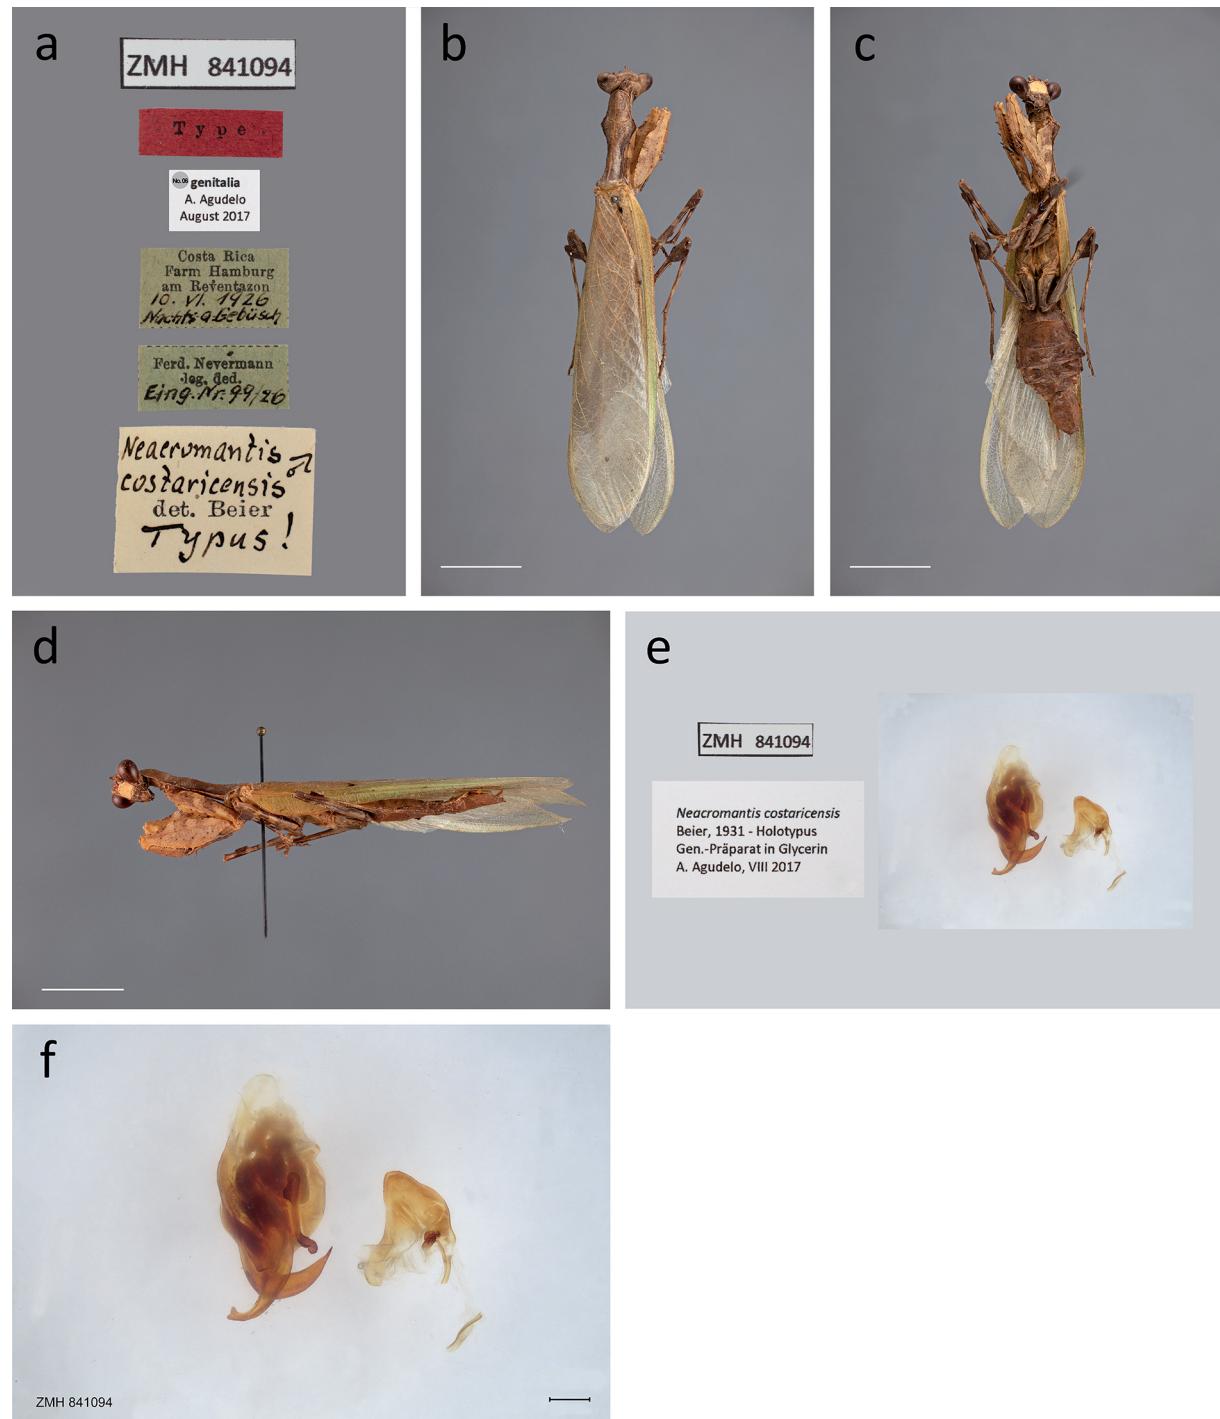

Suriname.

### Current status

Synonym of *Parastagmatoptera flavoguttata* (Audinet-Serville, 1838).

## Habitus

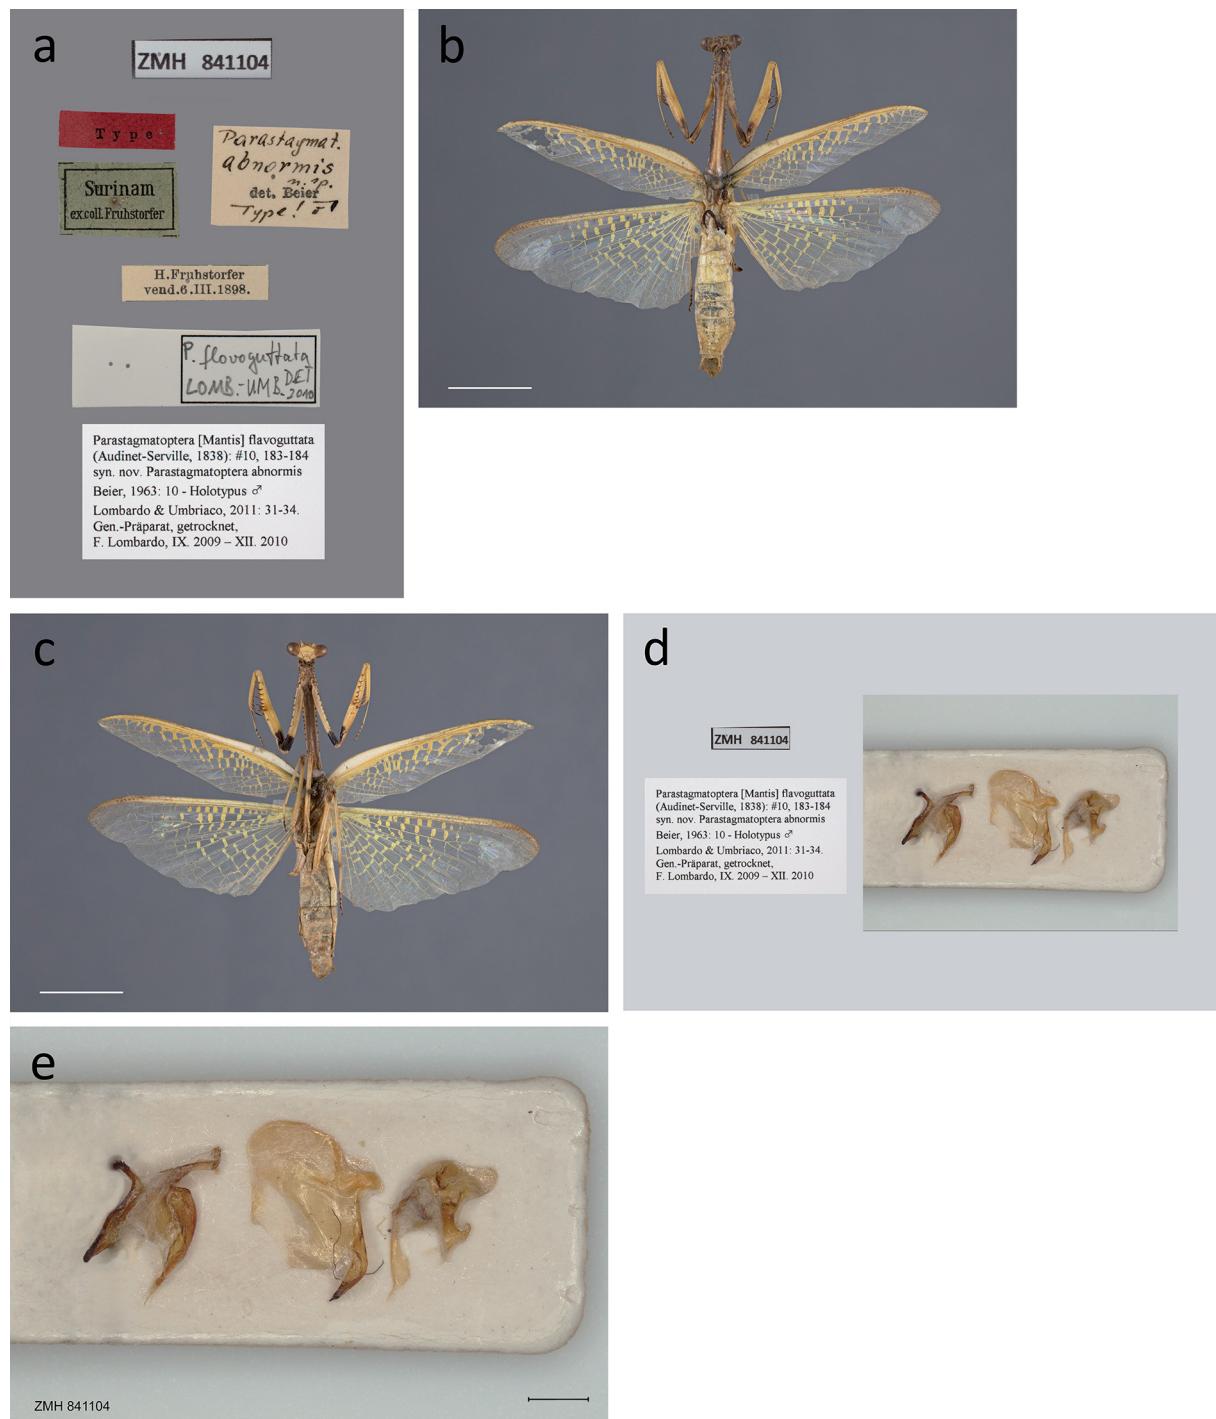

Complete. Genitalia were prepared after the images were taken.

**Fig. 27.** *Neacromantis costaricensis* Beier, 1931, holotype, ♂ (ZMH 841094). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d.** Lateral view. **e-f.** Genitalia. White scale bars = 10 mm; black scale bar = 1.00 mm.

### Remarks

Lombardo and Umbriaco discuss the fact that the present specimen is parasitized by a horsehair worm (Nematomorpha) and justify, based on morphological features, that it is an intersexual individual, i.e., that it bears intermediate rather than sex-specific characteristics, especially the wings and ocelli (Lombardo & Umbriaco 2011).

**Fig. 28.** *Parastagmatoptera abnormis* Beier, 1963, holotype, ♂ (ZMH 841104). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d-e.** Genitalia. White scale bars = 10 mm; black scale bar = 1.00 mm.

***Phaeomantis brevipes* Beier, 1931**

**Type locality**

Brazil.

**Current status**

Synonym of *Stagmatoptera binotata* Scudder, 1869.

**Habitus**

Complete.

**Fig. 32. a–c.** *Stauromantis parvidentata* Beier, 1931, holotype, ♂ (ZMH 841115). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** *Tisma pauliani* Roy, 2005, paratype, ♂ (ZMH 841085). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

## Remarks

The original description only refers to a single specimen from Brazil. This specimen is likely the one labeled as holotype, which is deposited at the Muséum national d'Histoire naturelle (MNHN) in Paris with the correct data and species name associated. Specimens labelled as syntypes are in the Muséum d'Histoire naturelle in Geneva, in the Museum Basel (NMB) and the specimen in Hamburg might be one as well. As these specimens are not mentioned in the original description and the labels state more detailed location information they are likely not part of the original type series. Yet, as the specimens from Geneva, Basel and Hamburg show a similar handwriting and the same location, it cannot be excluded they were considered in the original description, hence, we list the specimens here for reference.

*Stauromantis parvidentata* Beier, 1931

Fig. 32a–c

*Stauromantis parvidentata* Beier, 1931: 17.

*Stagmomantis (Uromantis) parvidentata* – Anderson 2020: 18.

Beier / Type! ♂”; ZMH 841092.

#### Paratype (1 female)

BRAZIL • 1 ♀ (Fig. 39a–b); “// Espírito Santo / (Brasil.) / J. Michaelis vend. / 22.IV.1898. // *Anamiopteryx grandis* / n. sp. / det. Beier / Type! ♀ / After the existing pictures / were made back in 2012 this / specimen went missing. / Therefore no ventral habitus / exists.”; ZMH 861000.

### Type locality

Brazil: Espírito Santo.

### Current status

Valid species.

### Habitus

Holotype male incomplete: second pair of legs is missing. Genitalia were prepared after the images were taken.

### Remarks

One paratype female could not be recovered and hence has to be considered lost.

#### Holotype (1 female)

NAMIBIA • ♀ (Fig. 44a–c); “// Type // Z. M. H. / Hamburg // v. Zastrow / ded. 5.IX.1913. // Zoolog. Mus. Hamburg / *Calamothespis* Type / *lineatipennis* Wern. ♀ / Fr. Werner det. 1922. // Zoolog. Mus. Hamburg / *Calamothespis* Type / *lineatipennis* Wern. ♀ / Fr. Werner det. 1922. // Fr. Werner publ 1923.”; ZMH 845358.

### Type locality

German South West Africa, likely Grootfontein [Namibia].

### Current status

Valid species.

### Habitus

Complete.

*Calamothespis tanzaniensis* Roy & Stieve, 2016

Fig. 44d–f

*Calamothespis tanzaniensis* Roy & Stieve, 2016: 19–20.

### Type material

#### Holotype (1 female)

TANZANIA • ♀ (Fig. 44d–f); “// *Calamothespis tanzaniensis* / Roy & Stieve 2016 / Holotype, ♀ // aff. *Paradanuria* / (? *Calamothespis* ♀ / *adusta* Werner 1907, 1 ♀ sp) / v Brunn XII. 1912 // Landsch. Turu / nördlichster Zipfel // Ostafri.-Exped. d. / Hamb. Geogr. Ges. / Dr. E. Obst leg. / G. Ges. ded. X.1912. // Balangidda-See bis Mkalama / 13.–19.IV.1911. // Z. M. H. / Hamburg”; ZMH 840286.

### Type locality

Tanzania: Lake Balangida to Mkalama, most northern end of landscape of Turu.

### Current status

Valid species.

### Habitus

Complete.

*Compsothespis michaelensi* Werner, 1923

Fig. 45a–c

*Compsothespis michaelensi* Werner, 1923: 109.

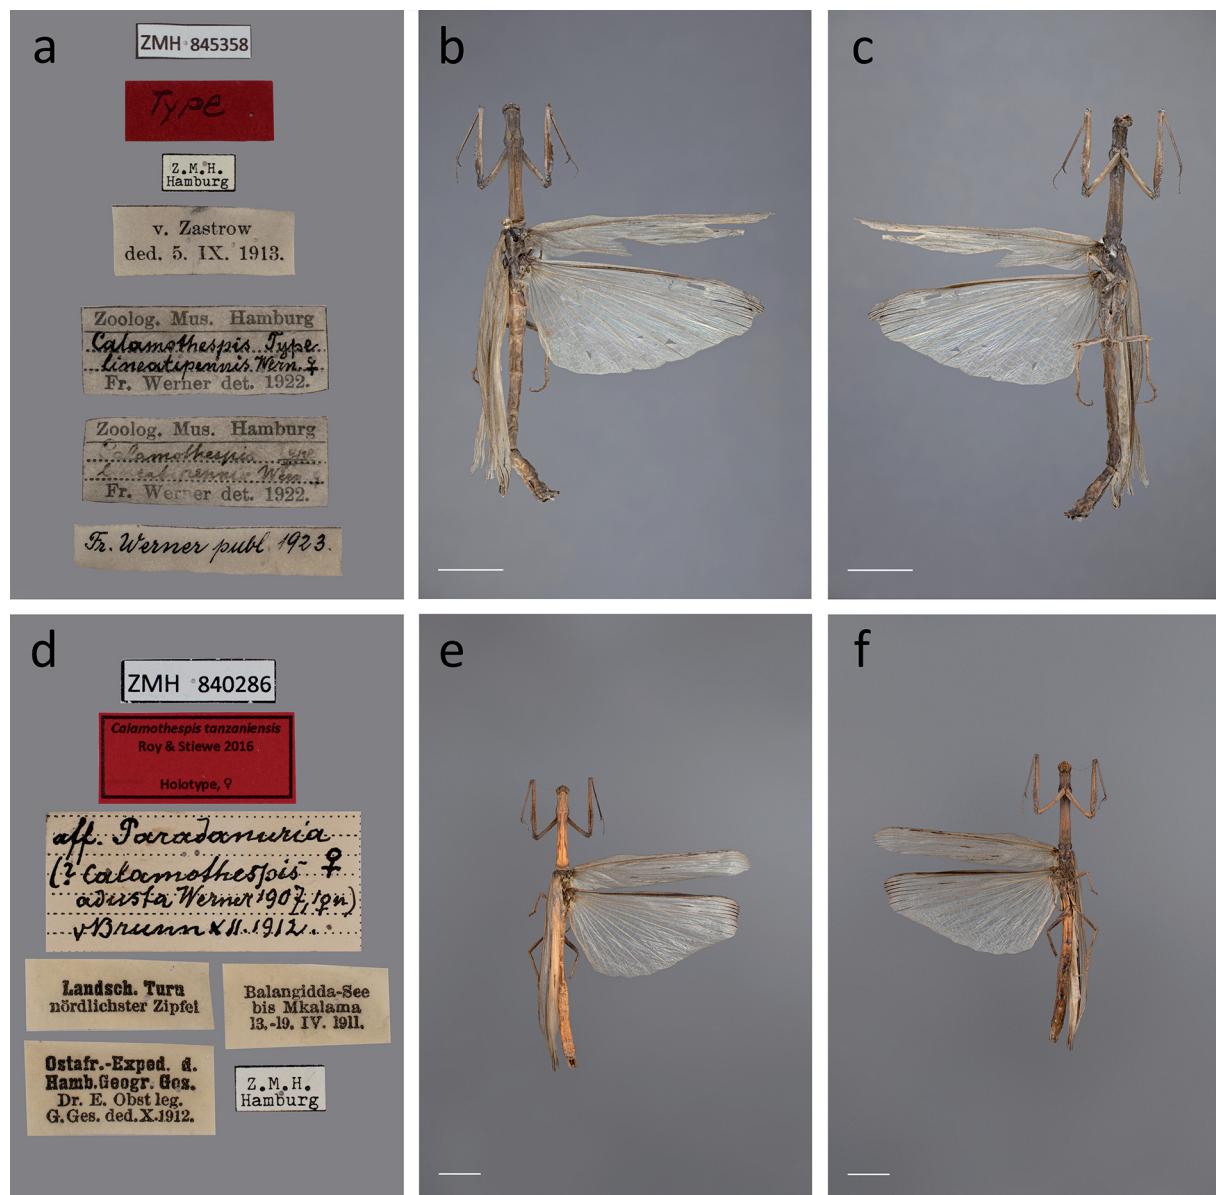

### Type material

#### Holotype (1 female)

NAMIBIA • ♀ (Fig. 45a–c); “// Hamb. dtsch-s.w. / afr. Studienr. 1911 / Neudamm / (42 km ONO Windhuk) / W. Michaelsen / leg. 10.–15. V. 1911. / ded. // Zoolog. Mus. Hamburg / *Compsothespis* ♀ / *michaelseni* Wern. Type / Fr. Werner det. 1922. // Fr. Werner publ. 1923. / W. Michaelsen ded. 15.III.1923.”; ZMH 831013.

### Type locality

Farm Neudamm, 42 km E/NE of Windhoek [Namibia].

**Fig. 44. a–c.** *Calamothespis lineatipennis* Werner, 1923, holotype, ♀ (ZMH 845358). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** *Calamothespis tanzaniensis* Roy & Stiewe, 2016, holotype, ♀ (ZMH 840286). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

### Current status

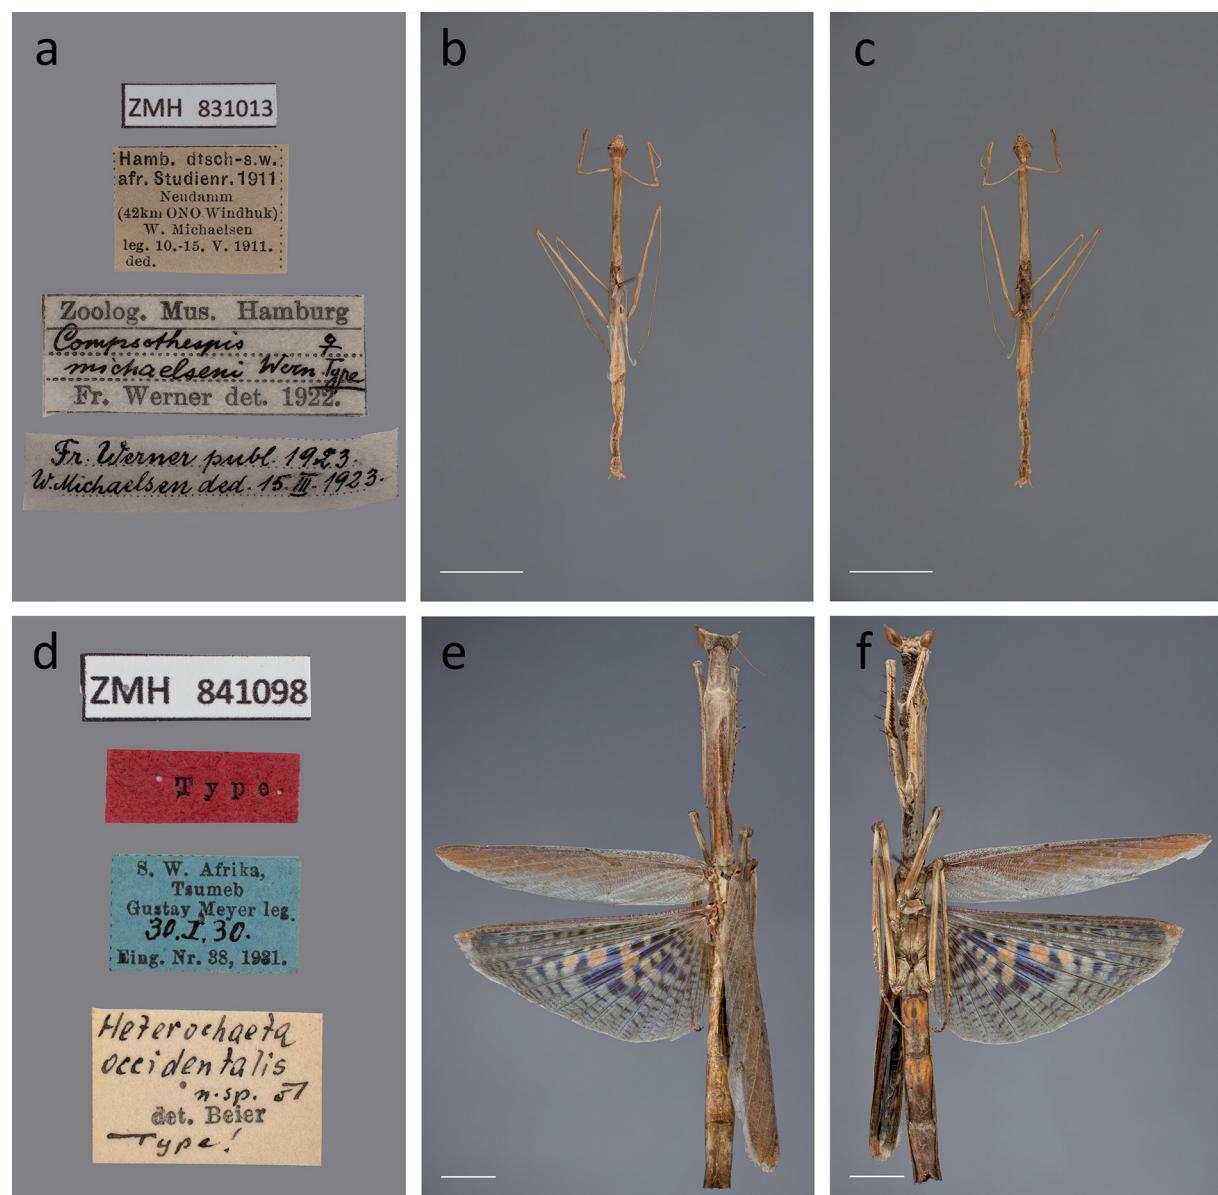

Valid species.

### Habitus

Complete.

### Remarks

In the original publication “May 1905” is stated as collection date for this specimen. This might be a mistake from Werner as other specimens from the same collector and location were all collected in 1911, which matches the data from the original label.

**Fig. 45. a–c.** *Compsosethespius michaelseni* Werner, 1923, holotype, ♀ (ZMH 831013). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–f.** *Heterochaeta occidentalis* Beier, 1963, holotype, ♂ (ZMH 841098). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. Scale bars = 10 mm.

***Heterochaeta occidentalis*** Beier, 1963  
Fig. 45d–f

*Heterochaeta occidentalis* Beier, 1963: 10–11.

**Type material**

**Holotype** (1 male)

NAMIBIA • ♂ (Fig. 45d–f); “// Type // S. W. Afrika, / Tsumeb / Gustav Meyer leg. / 30.I.30. / Eing. Nr. 38, 1931. // *Heterochaeta / occidentalis* / n. sp. ♂ / det. Beier / Type!”; ZMH 841098.

**Type locality**

South West Africa, Tsumeb [Namibia].

**Current status.**

Valid species.

**Habitus**

Incomplete: abdominal apex is missing. Abdominal apex was already missing in the original description.

***Oxyothespis longicollis*** Beier, 1931  
Fig. 46a–c

*Oxyothespis longicollis* Beier, 1931: 6–7.

**Type material**

**Holotype** (1 male)

SOMALIA • ♂ (Fig. 46a–c); “// Type // Eing. Nr. 127.1928. // Forschungsreise / C. v. Erlanger / Nord-Ost-Afrika. // BritOst-Afrika / Umfudu a. Ganale / 16.–25.6.1901. // *Oxyothespis / longicollis* / det. [crossed out] Beier / Type! ♂ // Mfudu 18/VI 01”; ZMH 841071.

**Type locality**

British East Africa, Munfuudhi at the Jubba River [Somalia].

**Current status**

Valid species.

**Habitus**

Incomplete: abdominal apex is missing.

**Remarks**

The type locality information given by Ehrmann (2002) is not correct. On the original label Mfudu is named as locality. Comparing the named localities depicted in a historical blueprint showing the course of the Jubba River from Bardere to the place called Mfudu (Hannington & Shaw 1903) with current maps we come to the assumption that Mfudu might be a historical name for Munfuudhi in Somalia.

***Toxodera spinigera*** Beier, 1931  
Fig. 46d–g

*Toxodera fimbriata* Werner, 1930b: 9.  
*Toxodera spinigera* Beier, 1931: 20–21.

*Toxodera fimbriata* – Beier 1976: 395 (syn.).

**Fig. 46.** **a–c.** *Oxyothespis longicollis* Beier, 1931, holotype, ♂ (ZMH 841071). **a.** Labels. **b.** Dorsal view. **c.** Ventral view. **d–g.** *Toxodera spinigera* Beier, 1931, holotype, ♂ (ZMH 841100). **d.** Labels. **e.** Dorsal view. **f.** Ventral view. **g.** Lateral view. Scale bars = 10 mm.

**Type material****Holotype** (1 male)

MALAYSIA • ♂ (Fig. 46d–g); “// Type // Borneo / Kinabalu / Waterstradt l. / H. Rolle vend. / 25.XI.1904. // *Toxodera / spinigera* / det. [crossed out] Beier / Type! ♂ // *Toxodera / fimbriata* Wern. / ♂ / R. Roy det. 2002”; ZMH 841100.

**Type locality**

Kinabalu, Borneo [Malaysia].

**Current status**

Synonym of *Toxodera fimbriata* Werner, 1930.

**Habitus**

Complete.

**Discussion**

We here present an updated list of the types of Mantidae housed in the ZMH. All of the types mentioned in the previous catalogues by Weidner still exist in the collection with one exception. The female paratype of *Anamiopteryx grandis* Beier, 1935 was last seen in the year 2012, where the first images of type specimens were taken. During our research for this publication the specimen could not be found and has therefore been considered lost.

The material formerly preserved in ethanol was prepared dry, so all type specimens mentioned in this catalogue can now be found in the dry collection, and more specifically in the separated type collection. Furthermore, we were able to add 12 new species to the existing type list. In total the collection currently contains 84 type specimens attributed to 64 species (Supp. File 1). Four type specimens of the genus *Nesogalepsus*, originally deposited at the ZMH, were transferred to the entomological collection of the Université d'Antananarivo, Département de Biologie Animale in Madagascar (UADBA) for reasons of Access and Benefit Sharing. These were *Nesogalepsus schuettei* (holotype ♂, paratype ♀), as well as *Nesogalepsus mandenensis* (holotype ♂, paratype ♀, two non-type specimens). Further, two types of *Tisma pauliani* Roy, 2005 (paratypes ♂♀), accidentally deposited at the ZMH, were transferred back to the collector Kai Schütte (Hamburg).

Overall, the Mantodea collection of the ZMH contains 3161 determined specimens distributed across 29 families, 213 genera and 597 species (Supp. File 2). Besides, there is a small collection of oothecae and a supplement with about 600 unidentified specimens in the dry collection and about 450 containers in the wet collection. The latter includes material mostly from Africa (300 containers) but also Asia (150 containers).

**Acknowledgements**

We would like to thank the following people for their ongoing support and help throughout this project: Antonio A. Agudelo Rondón (Bogotá, Colombia, Universidad Distrital Francisco José de Caldas), Chao Wu (IZCAS), Christina Lehmann-Graber (MHNG), Cornelia Ehrmann (Karlsruhe), Francesco Lombardo (DBUC), Frank Ehrmann (Wadersloh/Liesborn), Frank Wieland (PMN), Gavin J. Svenson (CMNH), Harald Bruckner (NHMW), Henrique Miranda Rodrigues (Brazil), Jason Weintraub (ANSF), John Hollier (MHNG), Julio Rivera (Département de sciences biologiques, Université de Montréal und Insectarium de Montréal, Quebec, Canada), Jürgen Thumulka (Karlsruhe), Lara Lopardo (ZIMG), Martin B.D. Stiewe (Gauting), Matthias Borer (NMB), Matthias Seidel (NHM), Mercedes París

(MNCN), Michael Falkenberg (SMNK), Nicolas Moulin (MNHN), Peter Detzel (Stuttgart), Peter Michalik (ZIMG), Roberto Poggi (MSNG), Stephan M. Blank (SDEI) and Susanne Randolph (NHMW). Special thanks to Kai Schütte (Hamburg) who donated us the above listed specimens of *Tisma pauliani* Roy, 2005 from his personal collection. Also a special thanks to Roger Roy † (MNHN) who sadly passed away April 2, 2023 at the age of 93 (Ehrmann & Ehrmann 2024). He put a lot of work into the Mantodea collection of the ZMH by checking and determining specimens for which we are grateful. With his passing the Mantodea community lost a scientist of outstanding merit. We will keep him in good memory.

Printed versions of all papers are deposited in the libraries of four of the institutes that are members of the EJT consortium: Muséum national d’Histoire naturelle, Paris, France; Meise Botanic Garden, Belgium; Royal Museum for Central Africa, Tervuren, Belgium; Royal Belgian Institute of Natural Sciences, Brussels, Belgium. The other members of the consortium are: Natural History Museum of Denmark, Copenhagen, Denmark; Naturalis Biodiversity Center, Leiden, the Netherlands; Museo Nacional de Ciencias Naturales-CSIC, Madrid, Spain; Leibniz Institute for the Analysis of Biodiversity Change, Bonn – Hamburg, Germany; National Museum of the Czech Republic, Prague, Czech Republic; The Steinhardt Museum of Natural History, Tel Aviv, Israël.

## Supplementary material

**Supp. file 1.** List of the 84 type specimens of Mantodea Burmeister, 1838 deposited at the Zoological Museum Hamburg (ZMH). Data type: Excel table. Authors: Eileen Nguyen, Reinhard Ehrmann & Martin Husemann. <https://doi.org/10.5852/ejt.2024.964.2693.12437>

**Supp. file 2.** List of all species of Mantodea Burmeister, 1838 that are currently deposited at the Zoological Museum Hamburg (ZMH). Data type: Excel table. Authors: Eileen Nguyen, Reinhard Ehrmann & Martin Husemann. <https://doi.org/10.5852/ejt.2024.964.2693.12439>
