At the beginning of the chapter ‘Acknowledgments’ should be added the following paragraph that was accidentally forgotten. The correct ‘Acknowledgments’ are given here.

### **Acknowledgments**

The authors would like to thank Agnièle Touret-Alby for all of her help in contributing historical documents and allowing CT to visit the MNHN and access the Ceraphronoidea collections, and for going above and beyond to track down missing specimens so that they could be included in this work. The authors would also like to thank all of the other curators and staff present at the MNHN collections; without access to these collections, this work would not exist. The authors would furthermore like to thank David G. Notton for his insight and expertise on the history of J.J. Kieffer. Special thanks to Norman Johnson and Luciana Musetti for their immensely helpful catalogue of Ceraphronoidea, which has no doubt advanced research efforts on the superfamily.
